ADDENDUM 1

October 9, 2026

Water and Sewer Engineering Services: RFQ# 27-009

The following information is provided in response to requests made prior to the deadline for questions:

1. Are firms only expected to review and acknowledge the contract-related provisions contained in this RFQ, or does the City intend to utilize a separate standard professional services agreement with additional terms and conditions? If a separate agreement will be used, can the City provide a draft for review during the RFQ process?
The City will utilize separate standard professional services agreements for each project issued under this RFQ.
2. Section 6.4 limits firms to “at least three and no more than six relevant projects” and allows “up to three additional municipal references” to demonstrate breadth. For firms submitting qualifications for multiple Categories of Work identified in Appendix A, does the six-project limit apply to the SOQ as a whole or to each selected category?
The six-project limit applies to each selected category.
3. Section 5.c. of the RFQ states that firms submitting for multiple categories may include an additional 5 single-sided pages for each additional category. Are additional project examples permitted within these pages per category, or does the 6-project example limit apply across the entire submission?
The six-project example limit to each selected category. The additional 5 pages may be used to accommodate these additional projects.
4. Would the City like us to present three to six projects per category, or are you looking for three to six projects total across all categories?
Three to six examples per category are allotted.
